Learning Targets for <i>Advanced Algebra &amp; Trigonometry</i> Sequences and Series Unit												
I can recognize patterns in a numerical list.												
I understand the difference between “continuous” and “discrete”.												
I know what a sequence is and how it relates to functions.												
I can use appropriate sequence notation.												
I can distinguish between explicit and recursive sequences.												
I can identify an arithmetic sequence.												
I can identify a geometric sequence.												
I can write functions for an arithmetic sequence.												
I can write functions for a geometric sequence.												
I know what a series is and how it relates to sequences.												
I understand what a partial summation represents.												
I can use sigma notation to represent summations (series).												
I can identify an arithmetic series.												
I can identify a geometric series.												
I can find the partial sum of an arithmetic series.												
I can find the partial sum of a geometric series.												
I can find the sum of an infinite geometric series.
