Learning Targets for <i>Advanced Algebra & Trigonometry</i> Applications Unit												
I know the formula for the Law of Sines.												
I know the formula for the Laws of Cosines.												
I can find the area of a triangle given its base length and height.												
I can define a sector.												
I can define the length of an arc.												
I know when to apply the Law of Sines.												
I know when the Law of Sines might be ambiguous.												
I know when to apply the Law of Cosines.												
I can solve any triangle given three parts (sides and/or angles).												
I can find the area of a triangle given three sides.												
I can find the area of a triangle given a side-angle-side.												
I can calculate the area of a sector.												
I can calculate the length of an arc.												
I can use vectors to describe motion.												
I can find the resultant of two added vectors.
